Chief –

This is a "Business" Systems Analyst created by Jeff, with more a project management flavor compared to the tech focus of the regular Systems Analyst. Jeff said this position has already been approved by the City but was unfunded due to Covid. He supports this concept with a clear delineation that his IT staff handles larger City networks related issues etc. He suggested the salary should be the same of the System's Analyst.

I like this idea better. This would be the position we hand our existing projects to: Online reporting, LPR, Body Camera research, Spidr Tech, Mugshot/Livescan upgrade, CAD/RMS provisioning etc.

Let me know your thoughts,

Dan
